

Reframely: the free online teleprompter

A teleprompter that runs in your browser on any phone, tablet or computer, and keeps working offline. No sign-up, no download, no watermark, and free for commercial use.

Open it: reframely.app/prompter · Plans: reframely.app/pricing · Updated October 2026

What Reframely is

Reframely shows your script near the camera lens so you can read it while looking at your audience. It is built for the situations where teleprompter apps let people down: rigs that ship with a weak app or none at all, remotes that drop out, and apps that need an account before you can read a line.

- **Free:** the full teleprompter, mirrored and upside-down text for glass rigs, presets for common rigs, speed in words per minute, Fit to time, Bluetooth clickers, foot pedals, keyboards and Stream Deck, Word, text, Markdown, RTF, Fountain and Final Draft import, a second-screen and OBS output, and offline use after the first visit.
- **Voice follow** scrolls as you speak and waits when you pause, with a rehearsal report after each read. It is free for 2 minutes a day.
- **Reframely Pro** adds a second phone as the remote (online or offline) and unlimited voice follow: Creator Pass \$10 for 7 days, or Creator Pro \$99 per year. Plans never renew automatically.
- **No account.** Scripts stay on your device. Pro uses a name and passcode instead of an account.

Start in a minute

- 1 Open reframely.app/prompter on the device that shows the script.
- 2 Paste or type your script. A line starting with # becomes a section you can jump to.
- 3 Pick your rig in the Display menu. The text is mirrored and the reading line placed for it.
- 4 Press Play, or Space on a keyboard. Change speed with + and -, or drive it with a clicker, a pedal or your phone.

Free and Pro

	FREE	PRO
Teleprompter on any device, offline after the first visit	Yes	Yes
Mirror, upside down and rig presets	Yes	Yes
Clickers, foot pedals, keyboards and Stream Deck	Yes	Yes
Second-screen and OBS output	Yes	Yes
Voice follow and rehearsal reports	2 minutes a day	Unlimited
A second phone as the remote, online or offline	No	Yes
Watermarks, word limits or ads	None	None

Creator Pass: \$10 for 7 days. Creator Pro: \$99 per year. Compare plans at reframely.app/pricing.

Works with your gear

Reframely works with any teleprompter that holds a phone, tablet or screen. These are the rigs, remotes and devices it has presets and setup guides for.

Glass teleprompters

GEAR	MODELS	IN REFRAMELY

<u>Chromebook</u>	Chrome	Install as an app, works offline
<u>Mac</u>	Safari, Chrome, Edge, Firefox	Second screen and OBS output
<u>Windows</u>	Edge, Chrome, Firefox	Second screen and OBS output

Every guide on the site

Each title below links to the full guide on [reframely.app](#).

Rigs

Many teleprompters ship with a weak app or none at all. Pick yours for a setup guide, what owners report about its software, and a one-tap preset in Reframely. [All rigs](#).

Glide Gear TMP 100

The Glide Gear TMP 100 ships without software. Run it with Reframely in the browser: mirrored text, the reading line at the lens and your phone as the remote.

Neewer X12, X14, X17

Trouble with the Neewer teleprompter app or its remote? Run a Neewer X12, X12B, X14 or X17 from the browser with mirrored text and your phone as the remote.

Desview T3, T5

Run a Desview T3, T5, T2, T12S or P17 from your browser: mirrored text, clicker button mapping and your second phone as the remote. Free, no sign-in.

Elgato Prompter and XL

Camera Hub text not scrolling, or want voice follow and file import? Use the Elgato Prompter as a display and run Reframely in a browser window on it.

Prompter People Pal

Prompter People's Pal and Pal Pro tablet prompters don't include free software. Run them with Reframely in the browser, with mirrored text and a phone remote.

Datavideo TP-300

Datavideo's DV Prompter app hasn't been updated since 2021, and the TP-300 has no remote in the box. Run it with Reframely, mirrored text and a phone remote.

Padcaster Parrot

Use the Padcaster Parrot with Reframely: import scripts, edit from a second phone so the iPhone keyboard isn't hidden, and map the Parrot remote's buttons.

Ulanzi RT02

The Ulanzi RT02 works with any teleprompter app. Set it up with Reframely in your phone's browser, with mirrored text and a phone or clicker as the remote.

GVM

Trouble with the GVM teleprompter app or its remote? Run your GVM rig from the browser with mirrored text, Word import and a full phone remote.

LensGo TC7

The LensGo TC7 uses the TCQI app. Run your TC7 or TC7S from the browser instead, with mirrored text and a second phone as a reliable remote.

SmallRig

Run a SmallRig teleprompter without the SmallGoGo app: no login, mirrored text in the browser, and your phone as the remote.

ikan

ikan Homestream app missing import or autosave? Run your ikan teleprompter from the browser with Word import, saved drafts and a phone remote.

Feelworld TP2A, Ambitful and budget kits

Feelworld TP2A, Ambitful and other budget phone teleprompters with weak apps or flaky remotes. Run them from the browser with Reframely and a phone remote.

DIY teleprompter

Build a DIY teleprompter from a picture frame or acrylic sheet and a box, then run it with a free browser app that mirrors your script. Phone as remote.

VEVOR and unbranded kits

Bought a VEVOR or unbranded teleprompter from Amazon or Walmart with no clear app? Set it up with a free browser teleprompter and mirrored text, and add a phone remote with Reframely Pro.

Laptop prompters (TMP 75, Little Prompter)

Set up a laptop teleprompter such as the Glide Gear TMP 75 or Little Prompter, or skip the glass and put a narrow script column under your webcam.

Studio prompter monitors

Run an HDMI or SDI prompter monitor (Autocue, ikan, Fortinge, MOGX, Prompter People) from free browser software, driven by a clicker, Stream Deck or phone.

Leeventi 4.0, 5.0, 6.0

Set up a Leeventi teleprompter (4.0, 5.0, 5.1 or 6.0) in the browser: free mirrored text and rig presets, plus a phone remote and voice follow in Pro.

Moman MT12, MT16

Run a Moman MT12 or MT16 teleprompter from the browser on an iPad, Android tablet or phone: mirrored text, rig presets and your phone as the remote.

FeelWorld TP10, TP16

Run a FeelWorld TP10 or TP16 teleprompter from the browser on your tablet: mirrored text, rig presets, clicker setup and your phone as the remote.

Fixes

The problems people run into most with teleprompter apps and remotes, and how to sort them out quickly. [All fixes.](#)

Remote not working

Teleprompter remote won't pair, only plays and pauses, or keeps switching off? Step-by-step checks for Neewer, Desview, GVM and other clickers, plus a free remote test.

Elgato Camera Hub not scrolling

Elgato Prompter text won't scroll in Camera Hub, or DisplayLink Manager keeps popping up on your Mac? Things users have tried, and a browser-based workaround.

Elgato Prompter no image

Elgato Prompter screen blank or not detected in Camera Hub? Elgato's official steps for Windows and Mac, the DisplayLink driver fix, and a browser workaround.

Text backwards or upside down

Why teleprompter text reads backward through the glass, when to use mirror or upside-down mode, and how to check it in seconds.

iPhone keyboard disappears

Paired a teleprompter clicker and now the iPhone or iPad keyboard won't appear? Why it happens and three ways to keep editing your script.

Text cut off at the edges

Words cut off at the sides of the teleprompter or hidden by the hood? Fix margins, text size and the reading line, and keep your place when you rotate.

Scrolling too fast or jumpy

Set teleprompter speed in words per minute, fit a script to a target length, and get smooth starts and stops. Why scrolling jumps and how to fix it.

Voice tracking loses your place

Why voice-activated teleprompters jump ahead or stall, how to set up for reliable voice tracking, and how Reframely's voice follow avoids big jumps.

Import a Word doc or Google Doc

Load a .docx, Google Doc, text or Markdown script into a teleprompter without copy and paste. Headings become sections you can jump to.

Features

A free browser teleprompter built around the problems creators have with rig apps. [All features.](#)

Phone as remote

Turn a second phone into a teleprompter remote with a 7-letter code or QR: play, pause, speed and section jumps over a direct link, even with no internet. Part of Reframely Pro.

Second screen output

Run the teleprompter on your laptop and show the script on a second monitor, a confidence screen or under teleprompter glass, mirrored and in sync.

Voice follow

An online teleprompter that scrolls as you speak and waits when you pause, with a rehearsal report after each read. Try it free for 2 minutes a day, no sign-up.

Mirror and upside down

Free online mirror teleprompter for beam-splitter glass: mirrored text, upside-down mode for overhead screens, and rig presets that set it for you.

Clickers, pedals, Stream Deck

Map any Bluetooth teleprompter remote, presentation clicker, foot pedal or Stream Deck button to play, speed and line jumps in a free browser teleprompter.

Words per minute calculator

Paste a script to count words and see how long it runs, or enter a target length to get the teleprompter speed you need in words per minute.

Speech length calculator

How many words for a 3, 5 or 10-minute speech, and how long is your word count? A free speech length calculator for slow, average and fast speakers, with pages.

1-minute speech: word count

A 1-minute speech is 120 to 160 words, about half a double-spaced page. What fits in 60 seconds, a structure that works, and how to time your script.

2-minute speech: word count

A 2-minute speech is 240 to 320 words, about one double-spaced page. What fits in two minutes, a structure for it, and how to time your script.

3-minute speech: word count

A 3-minute speech is 360 to 480 words, about one and a half double-spaced pages. Wedding toasts, the Three Minute Thesis, and how to time yours.

5-minute speech: word count

A 5-minute speech is 600 to 800 words, about three double-spaced pages. Eulogies, class presentations, Toastmasters speeches, and a minute-by-minute plan.

10-minute speech: word count

A 10-minute speech is 1,200 to 1,600 words, five to six and a half double-spaced pages. How to plan a 10-minute talk with slides or a demo, and keep it on time.

Send-to-Reframely bookmark

Select your script in Notion, Gmail or any web page and click one bookmark: Reframely opens with the text loaded. Free, nothing uploaded.

Uses

Setups and script tips for the most common reasons people reach for a teleprompter. [All uses](#).

YouTube videos

Read your YouTube script while looking at the lens: a free browser teleprompter with mirror mode and section jumps for retakes. Phone remote in Pro.

Presentations and speeches

Use a free teleprompter for speeches, talks, weddings and events: big text on a tablet or laptop, a presentation clicker or a helper scrolling from their phone.

Podcasts

Read podcast intros, sponsor reads and outros smoothly on camera with a free browser teleprompter. Keep each read as its own script and switch between them.

Online courses

Record online course lessons with a free browser teleprompter: import lesson scripts from Word, jump between sections, and keep a steady pace across modules.

Zoom and video calls

Keep talking points next to your webcam on Zoom, Teams or Google Meet with a free browser teleprompter. Good for webinars, demos and recorded presentations.

OBS and live streaming

Use a free teleprompter while streaming: read off-stream in a second window, or add it to OBS as a browser source with a transparent or green background.

Devices

Reframely runs in the browser, so it works on devices that teleprompter apps often skip. [All devices](#).

Chromebook

A free teleprompter for Chromebook that runs in Chrome with nothing to install. Voice follow, mirrored text for glass rigs and a phone as the remote.

Android, Pixel, Samsung

A free teleprompter for Android that runs in Chrome: Pixel, Samsung Galaxy and Android tablets, with mirrored text and rig presets. Pro adds voice follow and a second phone as the remote.

Amazon Fire tablet

Use an Amazon Fire tablet as a teleprompter with a free browser app. Mirrored text for glass rigs and your phone as the remote.

Windows

A free teleprompter for Windows that runs in Edge or Chrome: a narrow column under your webcam and keyboard or Stream Deck control. Pro adds voice follow and a phone remote.

iPhone and iPad

A free teleprompter for iPhone and iPad that runs in Safari: mirrored text for glass rigs and rig presets. Pro adds voice follow and another phone as the remote. Add it to your home screen.

Mac and MacBook

A free teleprompter for Mac that runs in Safari, Chrome or Edge: text right under the MacBook camera, a second display or Elgato Prompter, and keyboard control.

Compare

Honest comparisons, including when the other app is the better choice. [All compare](#).

Best free online teleprompters

CuePrompter, Speakflow, EasyPrompter, Teleprompter.com, Teleprompt.me and Reframely compared: what's free, phone remotes, voice scrolling and mirror mode.

PromptSmart alternative

Looking for a PromptSmart alternative? Compare PromptSmart Pro with Reframely, a free browser teleprompter that adds voice follow and a phone remote with Pro.

Teleprompter.com alternative

Teleprompter.com vs Reframely: a free browser teleprompter with mirrored text and no watermark, plus a phone remote and voice follow in Pro. No auto-renewal.
